

RAMEEZ AKHTAR

AI / ML Engineer | Full Stack Developer

ramizakhtarr@gmail.com | +92 304 3914410 | [LinkedIn](#) | [GitHub](#) | Layyah, Punjab, Pakistan

PROFESSIONAL SUMMARY

Motivated AI/ML Engineer and Full Stack Developer with hands-on experience building end-to-end intelligent web and mobile applications. Proficient in designing machine learning pipelines, Retrieval-Augmented Generation (RAG) systems, and full-stack architectures using React.js, Flask, and Firebase. Skilled at integrating large language models (LLMs), vector databases, and NLP to deliver production-ready AI solutions across FinTech and HealthTech domains. Currently pursuing a Bachelor of Science in Computer Science at the University of Layyah, with a strong record of applying coursework directly to real-world projects.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript

Frontend Development: React.js, React Native, Tailwind CSS, Responsive UI Design

Backend Development: Flask, REST API Design, Node.js

AI & Machine Learning: Scikit-learn, Sentence Transformers, RAG Pipelines, FAISS, NLP, Pandas, NumPy

Databases & Cloud: Firebase Firestore, Firebase Authentication, MongoDB, FAISS Vector Store

Concepts: LLM Integration, ML Pipelines, Vector Search, OOP, Agile, RESTful Architecture

PROJECTS

Smart Loan AI | React.js • Flask • Python • Scikit-learn • RAG • Firebase

March 2026 – May 2026

- Architected a full-stack AI-powered loan eligibility prediction platform; originally developed as an Android mobile app for CS-610 (Mobile Application Development) and later upgraded to a complete web application.
- Trained and deployed a Random Forest classifier to predict loan approval status based on multi-dimensional applicant financial profiles with high interpretability and accuracy.
- Engineered a Retrieval-Augmented Generation (RAG) pipeline using sentence-transformers with FAISS/ChromaDB vector stores to index and retrieve bank policy documents from 20+ financial institutions for context-aware AI responses.
- Designed a hybrid AI chatbot combining rule-based NLP for common financial queries with Gemini API as an intelligent fallback for complex open-ended questions, reducing hallucination and improving precision.
- Implemented secure user authentication, real-time data persistence, and session management using Firebase Authentication and Cloud Firestore.
- [ProjectCode](#)

MindCare AI | React.js • Gemini API • Tailwind CSS

May 2026 – Jun 2026

- Built a full-featured mental health support web application with an AI-powered conversational interface designed to provide accessible, empathetic mental wellness guidance.
- Integrated the Gemini API to generate context-aware, supportive responses tailored to user-reported mental health concerns and emotional queries in real time.
- Developed a fully responsive and accessible UI using React.js and Tailwind CSS with dynamic markdown rendering of AI responses via react-markdown for rich, readable output.
- Managed complex chat state and resolved critical UI rendering bugs (including a breaking change in react-markdown v9+), ensuring a smooth and seamless real-time messaging experience.
- [ProjectCode](#)

- Developed a data-driven movie analytics platform using machine learning and statistical analysis to surface actionable insights on cinematic trends, audience engagement, and box office performance.
- Applied classification, clustering, and regression algorithms to model patterns across movie ratings, genres, budgets, release periods, and audience demographics.
- Performed end-to-end data preprocessing on large-scale movie datasets: handled missing values, removed outliers, and engineered meaningful predictive features for modeling.
- Created interactive visualizations—trend plots, correlation heatmaps, and genre breakdowns—to effectively communicate findings and support data-informed content analysis.
- [ProjectCode](#)

EDUCATION

Bachelor of Science in Computer Science

Expected Graduation: 2027

University of Layyah, Punjab, Pakistan

Relevant Coursework: Artificial Intelligence Mobile Application Development , Data Structures & Algorithms, Database Management Systems, Software Engineering, Object-Oriented Programming, Operating Systems

ADDITIONAL INFORMATION

Languages: English (Professional Proficiency), Urdu (Native)

Soft Skills: Analytical Problem Solving, Team Collaboration, Rapid Prototyping, Technical Communication

Interests: AI/ML Research, Open Source Development, FinTech Innovation, HealthTech, Competitive Programming
